ABOUT ME

Motivated and detail-oriented Computer Science graduate from Universiti Teknologi MARA (UiTM), with a strong foundation in software development, web applications, database management, and machine learning. Gained practical experience in business requirements documentation, system analysis, and software testing through an internship in Business and Technical Support. Eager to contribute technical knowledge, problem-solving skills, and adaptability in an entry-level IT role.

PROJECTS

ReviewShield - Fake Product Review Detection Using Machine Learning and Sentiment-Behavioral Analysis

- Final Year Project
- Developed a web-based application to detect potentially fake and genuine product reviews from Shopee and Lazada.
- Implemented Random Forest and XGBoost machine learning algorithms for review classification.
- Applied text preprocessing, TF-IDF, sentiment analysis, and behavioural feature extraction to support review classification.
- Developed the application using Python, Flask, MongoDB, HTML, CSS, and JavaScript.

EDUCAT Learning Portal System

- Software Engineering Project
- Developed a web-based learning portal to support online educational activities and user management.
- Implemented features including user authentication, course registration, attendance updates, profile management, and learning material access.

ZUS Ordering System

- Java Programming Project
- Designed and developed a prototype ordering system for ZUS Coffee as an academic project.
- Implemented order management functionalities and user interface components using Java.

EDUCATION

Bachelor of Computer Science (Hons.)

- Universiti Teknologi MARA (UiTM), Jasin, Melaka (2023 - Expected 2027) | CGPA: 3.52

Matriculation Programme - Life Science Stream

- Kolej Matrikulasi Johor (2022 - 2023) | CGPA: 3.42

WORK EXPERIENCE

Business / Technical Support Intern — Codeflare Solutions Sdn. Bhd. (September 2026 - December 2026)

- Assisted in preparing and maintaining system documentation, including Software Requirements Specification (SRS), Data Flow Diagrams (DFD), and Software Design Specification (SDS).
- Supported business analysis activities through requirements documentation and reviewing system workflows.
- Assisted in preparing test cases, documenting expected results, and supporting User Acceptance Testing (UAT) activities.
- Collaborated with team members to review system functionalities, identify documentation issues, and ensure alignment with project requirements.

CERTIFICATIONS & ACHIEVEMENTS

- Data Analyst in Python (2025)
- Data Scientist in Python (2025)
- Associate Data Scientist in Python (2025)
- Gold Award — Virtual Product Idea and Innovation Showcase (2026)
- Gen-AI Champion Series 1: Smart Project Mastery & Information Management (2026)

ORGANIZATIONAL INVOLVEMENT

UiTM Blockchain Association (UBA)

- Member (2023)

ADDITIONAL INFORMATION

- **Programming Languages:** C++, SQL, Java, HTML, CSS, PHP, Python, JavaScript
- **Software & Tools:** Jupyter Notebook, GitHub, VS Code, XAMPP, MongoDB, Android Studio, Construct 3, MATLAB, Flask
- **Interests:** Software Development, Web Development, Artificial Intelligence, UI/UX Design, Business Analysis
